

Health Care Rates Comparison Graph
by Chris Swenson

The following graph was used to compare a specific department's health care rates to the highest and lowest performing organization in a regional organization. I was given a limited amount of space for the graph, thus the abbreviations: Dept = Department, DM = Diabetes Melitus, A1c = Hemoglobin A1c, LDL = Low-Density Lipoprotein. The data has been randomized for this sample.

Note: These numbers have been randomized
